PalmTEQ
Limited

PalmTEQ provides point of sale solutions tailored to suit your business.

Whether you are a small business, part of a large restaurant chain or a fine dining restaurant, WaiterPOS point of sale (POS) solutions can be tailored to suit your venue. Our solutions are completely flexible from the size and colour of the buttons to the layout of each screen. We have software developers continually updating and modifying our solutions to suit the needs of individual venues. WaiterPOS is designed to grow as your business grows.

Advanced Features

WaiterPOS has been designed specifically for and by people who know the hospitality industry. With the power of WaiterPOS functionality you can:

- Operate as a standalone terminal, link to multiple terminals or even be integrated with the WaiterPAD, PalmTEQ's handheld ordering system.
- Provide various operating modes such as quick-sale mode, bar mode, restaurant mode, and takeaway mode.
- Program a range of security levels from management to staff security.
- Automatically adjust prices for timed events such as public holiday surcharges.
- Store a large number of PLU's within the POS.
- Program a diverse range of features including daily specials, product recipe information, specific order notes and countdowns of limited products.
- Automatically split orders to the appropriate preparation printers, printing each order clearly and concisely.
- Store a variety of layouts or restaurant designs within the POS to suit your daily operation.

Ease of Use

WaiterPOS is straight forward and intuitive to use, ensuring staff can be trained quickly and working to their full potential. From the moment WaiterPOS is placed into your venue PalmTEQ staff are on hand to guarantee a smooth introduction into your business.

With WaiterPOS you can also specifically tailor the layout and the functionality of the touchscreen to suit the needs of your venue and your entire operation. This means that your staff can feel comfortable using WaiterPOS from the moment it is implemented.
